Objective

Full Stack Software Developer

Experience

ICICI BANK Ltd. – Deputy Manager

Feb, 2023 - Present

- Managing compliance and end-to-end processes, data quality analysis of account information.
- Collaborating with teams to address and resolve application errors.
- Carrying out end-to-end processes in current account opening and related processes and maintenance of data.
- Mentoring new joiners, completing quality work within timelines, and meeting new functional requirements.

Axis Bank Ltd – Deputy Manager IT

July, 2022 – Jan, 2023

- Expert in handling and solving application issues if arises .
- Maintaining of applications and coordinating with teams if problem arises.
- Experienced in working in agile environments and unit testing and deployment of applications
- Planning for requirements of updates in features in the existing applications

Kotak Mahindra Bank – Back Office Team Leader

Feb, 2022 – July, 2022

- Expert in handling and solving application issues if arises .
- Maintaining of applications and coordinating with teams if problem arises.
- Experienced in working in agile environments and unit testing and deployment of applications
- Planning for requirements of updates in features in the existing applications

Projects

1. Video Call Application
March 2025 - April 2025
 - Tech stack - spring boot application, thymeleaf, tailwind CSS,
 - Javascript, zego cloud server
 - To build an application which can connect two users over video calls
 - Built a scalable, robust application which can connect two or more users over the video call.
 - <https://github.com/jiraiyasuman/video-call-application>
2. Real Time Chat Application
April 2025 - April 2025
 - Tech Stack - spring boot framework , Thyme leaf , Mongo and MySQL databases, Websockets, Tailwind CSS, javascript
 - An application which can send bidirectional messages between two users
 - Built a scalable application which can send bidirectional messages between the users.
 - Implemented Websockets in the application so that users can message in real time.

<https://github.com/jiraiyasuman/chat-app--one-to--one>
3. Expense Tracker
April 2025 - April 2025
 - Tech stacks - Spring Boot RESTFUL API, Express JS, Node.JS , HTML, Javascript, my-sql database, Junit, Mockito testing, CI/CD pipelines
 - using Jenkins, AWS deployment, docker containerization, Kubernetes
 - An application which can maintain expense of an user
 - Built an scalable application which can track day-to-day expenses of an user.
 - Performed unit testing using Junit and Mockito
 - Implemented continuous CI/CD pipeline using jenkins
 - Implemented docker for containerization and kubernetes for orchestration
 - Implemented caching using Redis.

4. Voice assistant agentic AI-Pashupathasthra AI
May 2025 – present
 - Tech stack - python, GUI, stand-alone application
 - An AI which is voice commanded and which can perform several tasks
 - Built a AI which takes command from user in terms of voice and performs tasks.
 - Implemented real time weather detection based on your current location
 - Implemented real time face analysis and detection of age, gender and emotions
 - Implemented automation for browsing of google, youtube and other social media websites
 - Implemented automation for usage of other in-built applications

<https://github.com/jiraiyasuman/voiceassistantai>
5. MUJ Unity Fest 2025
April 2025 – Present
 - Tech Stack : Node.js , Express.Js, React.Js , Mysql, Tailwind CSS ,
 - Javascript
 - Leading and supervising the team of developers for the project.
 - An application for the annual cultural fest of the university
 - built an application which can allow the user to register for the events
 - User can register for the events

- Admins/Committee members can monitor on the user participation
 - Implemented a payment gateway which can allow the user to pay for the registration fees for the events
6. Ride Booking App
June 2025-Present
- Tech Stack: Spring Boot RestFull API, jwt, google API , javascript, HTML5, Tailwind CSS, React.Js,Node.Js, Express.Js
 - Authentication with JWT – Backend
 - Authentication with JWT – Frontend
 - Dashboard Setup & Role-Based Access
 - Ride Booking by Rider
 - Driver Accepts Rides + Ride History
 - Real-Time Ride Status + Payment
 - <https://github.com/jiraiyasuman/cab>
7. Social Media App(Instagram Like application)
July,2025 – Present
- Tech Stack: Spring Boot RestFull API, javascript, jwt, HTML5, Tailwind CSS, React.JS,Node.JS, Express Js, MySql
 - Authentication with JWT – Backend
 - Authentication with JWT – Frontend
 - Posts, Comments, Likes features
 - <https://github.com/jiraiyasuman/social-media-app>
8. Guljo Engineering Solutions
July 2025 – Present
- Tech Stack – Spring Boot Backend, Actuators, Thymeleaf, Tailwind CSS, javascript, MySql, redis caching, Docker
 - Online learning platform which provides educational contents for the learners.
 - Admin can track who all have purchased their contents and can track who have visited the website using real time business analytical models.
 - Integrated payment gateway portal for making payment
 - <https://github.com/jiraiyasuman/guljo>

Education

Manipal University, MBA	2024-2026
Major: Management Information System – 85%	
Manipal University, Masters	2023-2024
Major: Banking and Finance – 87.5%	
St. Xavier's College, Bachelor's	2015-2018
Major: Chemistry – 64.75%	

Skills & abilities

- Backend Stack – J2EE, java, Spring boot, python, node.js
- Frontend Stack - React.Js, Express.Js, HTML5, CSS3, Bootstrap, Javascript, ajax, JQuery, Tailwind CSS
- Communication
- Leadership
- Team collaboration

- Problem Solver
- Project Management
